Dear Partners.

Currently, there are cases wherein the information for the student's gender is incorrectly provided during registration. As a result, this creates a problem on the assigning of rooms to these students prior to them coming here since room assignments are based on their gender.

To mediate this problem, from hereon forward, **we will be asking from you a scanned file of their passport bearing their personal information.** Kindly attach their scanned passports in the email you will be sending us. Should you fail to provide us with passport, there might be a possibility of the student not to be accommodated due to change in gender-based room assignment. In this regard, we will have to cancel the student's registration.

We have come up with this decision to protect the student's welfare and privacy. We ask for your understanding and cooperation on this matter in order to provide a safe training ground for students. Thank you.
